

MSP Verify Certification SOC 2 Type 2 Audited

EO Johnson Business Technologies and Lockett Managed IT completed MSPAlliance's MSP Verify Program (MSPCV) certification and SOC 2 Type 2 audit. These audits come with four written reports with the entire process documented, validated, and signed by a third-party accounting firm. The MSPCV has been reviewed by governmental agencies around the world.

2% Only 2% of managed service providers globally have these reports.

LEVEL 3 Our Cyber Verify certification is level 3—the highest level available.

SOC 2 Type 2 and Information Security

At EO Johnson, we understand information security is a top concern for our clients today. We are SOC 2 Type 2 audited and Cyber Verify certified, providing our clients data security reassurance with their service provider.

Service organization control (SOC) 2 is an auditing procedure designed to ensure that a third-party service organization can securely manage data to protect the interests and privacy of its clients.

A SOC 2 Type 2 audit reviews the operating effectiveness of internal controls for security, confidentiality, processing, integrity, privacy, and availability of customer data over an extended timeframe. Our internal controls were reviewed for a 12-month period.

A Secure Technology Partner for Your Business

If your organization is in a regulated industry, or you simply have a strong focus on information security, our SOC 2 Type 2 audit and companion report can provide the peace of mind you are looking for in a service provider.

We are a partner who values information security as much as you do.

We provide an additional layer of confidence and support for your data privacy program.

We keep your information protected.
